Log Sheet for 2021 HPL Oyster Hatchery Larval Microbiota Time-Series

Instructions:

- For each tank drop, please add a scoop of larvae from the sieve, (using sterile scoop), to a pre-labeled tube that contains buffer. Keep the tube on ice until frozen.
- Log the tube number, date, brood number, your initials or name, and any comments.
 - Comments may include status of the larvae and irregularities in sampling, or any other relevant details.
 - If the larvae look strange, please take a picture of the larvae next to the tube you will be using. Please indicate that you took a picture in the comments.
- Put samples in a labeled freezer box in the Larvae Time Series Rack of the Cram Lab
 -80 Freezer in AREL 2

Tube #	Date	Brood #	Your Initials	Comments
